

PRESS RELEASE

HIGH COMMAND RANGE: CALIFORNIA XL "A NEW CLASSIC"

The latest addition to the Matwatches line combines strength of character and a sense of elegance while retaining its military origins. A new wind is blowing, bringing a pure neoclassical spirit to the independent French brand's collection.

California XL – 42,5mm

MATWATCHES specializes in the manufacture of highly robust and accurate military watches with its OPS Range (Diver Pro, Commando, Aero etc) - qualities that are based on proven technical specifications: an imposing 44 mm diameter, very thick sapphire crystal, Water Resistant tested to 300 metres.

Equipped with noble materials, regularly tested in the most extreme situations, MATWATCHES timepieces are approved by Elite Army units. Performance and reliability are the watchwords of this independent French brand.

Ref. LEGION (OPS range - 2013)
Current 44mm range: STRENGTH

Ref. CALIFORNIA (2015)
39mm range: DISCRETION

The High Command watches have retained the distinctive DNA of MATWATCHES OPS range, with its sharp angles and refined dials, to ensure a superior read quality in all conditions.

California – 39mm

Powered by Swiss self-winding mechanical movement (ETA 2824-2) which is both robust and accurate, the AG7 has the unmistakable genetic codes of a High Command watch.

With its barrel shape and 11.5 mm thickness, its case (39mm diameter) is highly discreet and comfortably refined. Its large dial aperture and wide strap also give it a conspicuous presence on the wrist. The High Command watch is perfect under the sleeve of a high-ranking military officer or a modern man who just loves things of beauty. Discreet but easy to read, it is ideal for use in the preparation of everyday missions.

With its intelligently designed, short lugs, it offers maximum comfort while the "vintage" design of the strap combines perfectly with the whole unit. The new features offered by the AG7 make it a mixed watch.

OFFICER

CALIFORNIA BLUE

CALIFORNIA

Both sporty and classic (39 mm diameter), the High Command watch is elegant and reliable and is a perfect fit for any wrist.

Tactical strap

Due to the success of the 39mm High Command line, Matwatches has decided to release a more contemporary model with its 42.5MM diameter.

With its more generous and modern dimensions, Matwatches took the opportunity to also strengthen the domed sapphire crystal up to 2.8mm instead of the usual 2mm sapphire of the 39mm line. For reference our OPS line with its 44mm diameter is carrying a reinforced 4mm flat sapphire crystal.

Our California XL bears the discretion of our original California (39mm) while having almost the same resistance and sturdiness of the OPS line (44mm)

This timepiece is equipped with the usual sturdy and accurate ETA 2824-2 and has reinforced springbars such as our OPS line models.

Equipped with 3 different straps, a natural leather strap, a rubber band and a tactical strap our California XI will be the faithful companion of all your missions.

TECHNICAL SHEET – AG7 CALIFORNIA

MECANISM

Caliber: ETA 2824-2 – Swiss Made

Frequency: 28800/h
